*„I don't want to miss it anymore!“*

SEAL Systems' robust solutions make business processes quicker, more cost-effective and more reliably. They are used by many large and medium-sized enterprises, with over 1000 installations in 35 countries.

# Our mission and goals

## OUR MISSION

// SEAL Systems has long been the global leader in Document Output Management solutions. We are also focused on expanding our product offerings through the continual evolution of existing solutions and the development of new ones.

## OUR GOALS

**Customer's first choice** ::: SEAL Systems has developed sophisticated processes for standard tasks which are performed with consistency and reliability. Our customers, who demand the best for their enterprise, rely on SEAL Systems.

**Long-term profitability** ::: Sustainable profitability is essential for the continuity of an enterprise. Our robust and reliable solutions have been contributing to our client's success for the past 20 years and will continue to do so into the future.

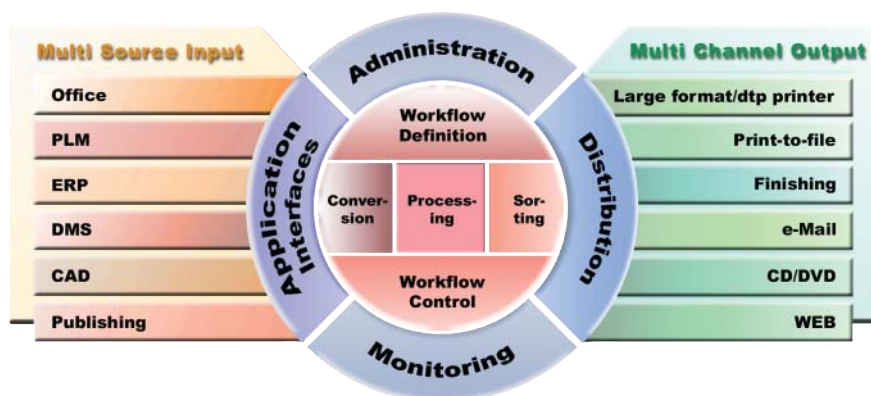

**International growth** ::: Founded in Germany, one third of SEAL Systems' revenue is now generated outside of Germany. This share has grown consistently as our international branch offices and committed service partners assist our customers to implement SEAL Systems solutions worldwide.

**Inspired people** ::: Well trained and motivated staff are the key to success for any service-orientated enterprise. SEAL Systems provides our employees with an enjoyable work environment. Our customers benefit from the know-how and commitment of our employees and associates.

## Solutions for our customers

**PRINTING SOLUTION** // SEAL Systems provides a unique enterprise-wide platform for print output:

- ∴ **Business Printing** – Printing management for ERP applications (such as SAP) to all printers produced by all manufacturers.
- ∴ **Engineering Printing** – Document distribution from CAD, DMS, and PDM/PLM.
- ∴ **Network Printing** – Services for standardised print control from desktop, Office, and in terminal server environments.

### DIGITAL DOCUMENT DISTRIBUTION

∴ As an alternative to printing, documents can also be distributed electronically as a file, an email or a fax. They could also be burnt to a CD or a DVD.

**Direct Publishing** is the automatic composition of complete manuals and documentation.

### ARCHIVING

∴ The digital archiving solution from SEAL Systems has integrated output management. Therefore administration and distribution of technical documents can be solved quickly and simply.

### SAP® INTEGRATION

∴ SEAL Systems has best practice solutions for distribution, conversion, and loading of external documents for SAP applications – **SAP PLM, SAP DMS, cFolders** and **SAP Records Management**. SEAL Systems-designed processes provide comprehensive document output management for manufacturing, procurement and asset maintenance. These world class processes provide immediate benefits to the customer.

### PROFESSIONAL SERVICES

∴ SEAL Systems offers a complete service package for an effective project: analysis of requirements, specification, implementation, installation, launch, test, final inspection and documentation. Post-implementation, SEAL Systems provides ongoing customer support.

### CONVERSION

∴ SEAL Systems provides tools for the conversion of data generated by various applications to TIFF and PDF formats. Through our PDF Longlife suite we are now also able to provide tools to generate and convert to **PDF/A** format.

### BEN PRINTING

∴ **BEN** stands for **Business, Engineering, and Network Printing**. SEAL Systems has developed an integrated standardized output and distribution environment for business, engineering, and network printing requirements, regardless of document file formats. This integrated solution is becoming more and more popular.

# Data and facts
